Cara Memasang Batu Alam

Periksa tegel mosaic sebelum dipasang

Pasang mosaic menggunakan tile adhesive atau adukan semen pasir dengan perbandingan 1:1

Perhatikan posisi mosaic pada saat pemasangan untuk menghindari terlepasnya dari rangkaian

Isi NAT dengan bahan khusus yang banyak dijual di pasaran (Wall Cladding tidak perlu di NAT)

Pastikan permukaan terpasang rata, tidak bergelombang

Segera bersihkan mosaic dari kotoran bekas semen, sesudah pemasangan

Coating dengan *clear doff* atau *clear glossy* yang banyak dijual di pasaran sesuai selera

Cara merawat Batu Alam

Cuci batu alam dengan air dengan bantuan sikat/ kuas

Cek lapisan *coating* pada batu alam, kalau sudah terkelupas, bisa diberi *coating* lagi

Setelah permukaan batu alam dibersihkan lalu keringkan segera dengan handuk lembut.

Pertimbangkan juga memasang pelindung marmer dan granit yang tersedia di toko bangunan untuk memperkecil potensi kerusakan pada permukaannya.
