Lighter. Prettier. Affordable

Wall Tiles

30x60 REVAMP

Lighter. Prettier. Affordable

Roman ceramic wall tiles have indeed introduced a series of new collections with various enhanced features. Double firing technology is an innovation that can improve product quality by providing a smoother and glossier final result. With this technology, tiles become more resistant to scratches in everyday use.

A lighter body will facilitate the installation process. A lighter body means tiles are easier to transport and arrange, ultimately saving time and effort during installation. Enhanced design and color appearance with digital technique technology provide richer and more varied options.

You and Roman

SHADE VARIATIONS

Shade variations are the characteristic of the tile that deliberate and visible differences in graphics and colour hue. Digital Tecnica technology creates stunning ceramic tiles with hyper-realistic surface tones, markings and textures which mimic a range of natural materials including; stone, timber, terracotta, cement, mosaic, marble and more.

Uniform
Appearance

Slight
Variation

Moderate
Variation

Substantial
Variation

V1 (Uniform Appearance)

Differences among pieces from the same production run are minimal.

Austin White
50x50

V2 (Slight Variation)

Clearly distinguishable differences in texture and/or pattern within similar colors.

dCervino Bone
50x50

V3 (Moderate Variation)

Amount and intensity of colors on each piece may vary significantly.

dTimber Brown
50x50

V4 (Substantial Variation)

Random color differences each tile, so that one tile may have totally different colors from other tiles.

dBudapest Vintage
50x50

R-RATING SLIP RESISTANT

Floor tiles these days are given an anti slip rating. This rating comes in the form of an 'R' value (Ramp test) with a scale from R9 to R13 (R9 having the least slip resistance and R13 the highest slip resistance).

Classification	R9	R10	R11	R12
SLIP ANGLE	6-9 DEGREE	10-18 DEGREE	19-26 DEGREE	27-34 DEGREE
WET SLIP RISK	High risk	moderate	moderate	low risk
AREA OF USE	dry area	occasional wetness	outdoor enviroment	wet/outdoor enviroment

- R9 : For internal dry area usage.
- R10 : For internal area with occasional spill or wetness (need constant cleaning/drying) : kitchens and bathrooms.
- R11 : For internal usage with constant spill or wetness (require continous cleaning and drying effort).
- R12 : For external usage (works in dry and wet situation with cautions).
